742 Bay Road Queensbury, NY 12804**

Register at Queensbury.eventbrite.com

Learn how energy specialists can help you adhere to the energy code.

This unique training will allow building code enforcement, and design and construction professionals to explore case studies, discover best practices, and network with other industry professionals.

Topics

- Where energy professionals fit when designing, building and enforcing to the energy code
- Differentiating common residential energy professionals, their services and qualifications
- Each energy professional's potential contribution to code compliance
- How and where energy professionals fit into building design, construction, and enforcement

An **Energy Professional Registry** website has been developed to make it easier to find energy services that will fulfill the energy code requirements of New York State. Use the registry to search specialists by name, company name, service offered, certifications held, location, and contact information.

Attending this course qualifies you for inclusion in the Energy Professional Registry.

NY DOS, ICC, USGBC, AIA, BPI, RESNET, and IACET credits available.

Representing IBTS,
an Independent Contractor to NYSERDA
