

Water Quality and You

We all live in a watershed and what we do within that area can affect our water quality.

To raise awareness of this issue and to provide information on what you can do to reduce the impacts, the Town of Queensbury, The Lake George Association and the Warren County Soil and Water Conservation Districts are hosting a presentation focused on water quality.

In Queensbury, twenty eight percent of the land is in the Hudson River Watershed and seventy two percent is in the Champlain Watershed and the vast majority of our waterbodies are affected by stormwater runoff. This presentation will provide an introduction in recognizing problems and discussing potential solutions.

We hope to see you there and plan on bringing questions!

When: 6:00—7:00 PM, February 14, 2017

Where: Town of Queensbury 742 Bay Road, Queensbury NY 12804
