Please Read Carefully

The applicant is responsible for all costs incurred to make the connection and install a water main from the existing main thru the development or into the building. This installation must comply with the New York State Building Codes & Queensbury Water Design & Construction Standards.

- **Approved Plans:** Plans of proposed work should be submitted to and approved by the Queensbury Water Department prior to start of any construction. A stamped copy of the approved plans should be on the construction site at all times.
- **Permits:** If working in a Right-of-Way, a signed and approved copy of the Highway, County or State Excavating Permit needs to be on-site or attached to this application, before any tap will be done.
- **Taps:** A tapping contractor approved by the Queensbury Water Department shall make all taps.
- **Greater than 2":** All water lines greater than 2" in diameter will be the customer's responsibility to maintain from the gate valve to the building for private connections.
- **Water Department Control:** Operation of all curb valves, gate valves and hydrants under pressure shall be done by duly designated employees of the Water Department.
- **Inspections:** All installations of water mains and appurtenances must be inspected by the Water Department prior to backfilling. Inspections will be done during normal business hours. No inspections will be made after hours, holidays or weekends.
- **Testing & Disinfection:** All water mains will be pressure tested by the contractor and certified by his engineer. Certification will be supplied to the Water Department. Disinfection will be the responsibility of the contractor. The contractor and/or developer shall coordinate and schedule testing and disinfection with the Water Dept.
- **Meters:** For domestic water use in the Queensbury Consolidated Water District all water meters must meet the Queensbury Water Department Design and Construction Standards. The engineer/architect hired for the project will provide the size of the water meter. All meters larger than 2" are considered special orders, therefore, the meter and accessories must be paid for prior to the Queensbury Water Department placing an order with the Badger Meter Company.
