Christopher Harrington  
Water Superintendent  
Acting Wastewater Director

Alex Benway  
Water Treatment Plant Operations Engineer

8/24/2020

The following policy shall apply to the need for pressure reducer installation. The NYS Plumbing Code 604.8 where water pressure within a building exceeds 80psi static, an approved water pressure reducing valve conforming to ASSE 1003 with strainer shall be installed to reduce the pressure in the building water distribution piping to 80 psi static or less. This means a prv is required in all areas **except those areas listed below.**
